—Scott T. Haynes of Gallatin, shipped a car load containing 22 horses to St. Joseph, Mo., on Monday. He paid \$738 for the lot. In 1892, the same or equally good horses would have cost him \$2,000. The difference of those two years is not only in the price, but in the business men of that county who would have sold nearly that many more goods. The people are paying very dearly for the "campaign of education," but some people earn best in the school of experience.

—St. Joseph Republican.

—Lafayette county is an all round Democratic county, and the leaders of the party are determined that none but Democrats shall hold the office, and have so fixed things down there that the Populist vote will have much difficulty in arranging his ballot. Instead of making the ticket as it should have been made, with all the names under the Populist heading, the fixers have split the ticket and put some of the names on one side and some on the other, estimating the voter to hunt all over a ballot as big as the side of a barn for the names for which he desires to vote. And better bargain; see the whole of it in his trade, for that brings competition and competition means lower prices and better bargain; see the whole of it in his trade, for that brings competition and competition means lower prices and better bargain; see the whole of it in his trade, for that brings competition and competition means lower prices and better bargain; see the whole of it in his trade, for that brings competition and competition means lower prices and better bargain; see the whole of it
